3. Run Java Console Program using Apache Maven

Java

- JRE(Java **R**untime Environment)
 - Run .class File
 - \$ sudo apt install **openjdk-17-jre**
 - \$ java -version
 - Also have JVM(Java Virtual Machine)
 - JVM is used to Provide complete runtime solution
 - Used by Operation, Testing, Client team
- JDK(Java Development Kit)
 - Used by Developer/Coder/Software Engineer
 - \$ sudo apt install **openjdk-17-jdk**
 - \$ javac -version
 - Translate(Compile) .java file

- Pass = Generate .class file
- Fail = Errors

Write Java Project(.java) --> javac(Compile) --> .class --> java(run)

```
$ sudo apt update
$ sudo apt install openjdk-17-jdk
  Compile = JAVAC
  Run = JRE(JVM)
```
